MODULAR ELECTRONIC DESK SYSTEMS

The most experienced manufacturer in the electronics enclosure field introduces a totally new desk system dedicated to establishing tomorrow's standards of quality and excellence . . .

DESK SHOWN ABOVE IS A 203-CCL WITH DOOR

EQUIPTO ELECTRONICS CORPORATION

MODULAR ELECTRONIC

Features that make Equipto Electronics the new

● **EASILY ASSEMBLED UNITS** (only one tool required) can be shipped knocked down to save on freight and storage, or shipped completely assembled.

RUGGED PYLON ASSEMBLY — a strong structural support plus a hidden, yet easily accessible compartment for storage and passage.

UNIQUE DESIGN. Trapezoidal shaped pylons (end supports) with internal storage space.

PYLONS have quick-access latched panels or external mar-proof, screw-fastened panels. Floor levelers are standard but may be replaced with locking or non-locking ball casters.

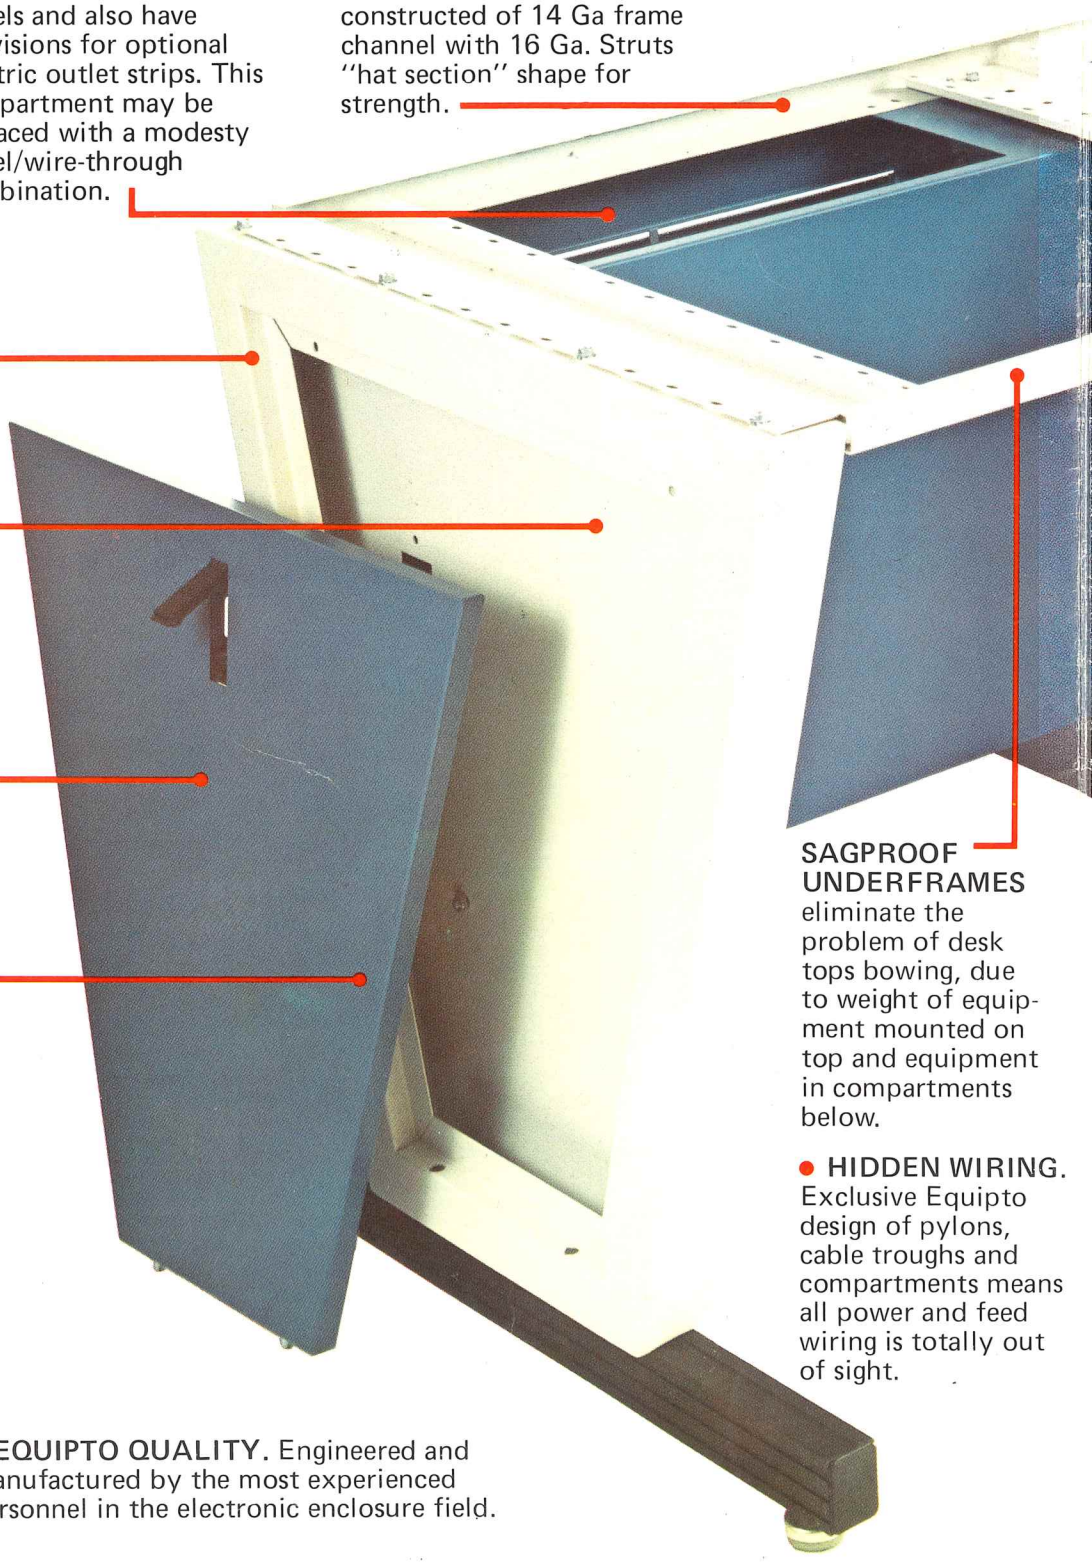
EASY TO REMOVE PYLON PANELS — quick-off latch panels or screw-fastened panels available.

● **DETAIL.** Every visible and invisible detail in the design and manufacture of our units reflects our commitment to produce the very finest available . . . anywhere.

● **EVALUATION OFFER.** If you need a specific desk unit to evaluate, test, actually mount instrumentation on, or even destructive-test, ask for our unique ENGINEERING EVALUATION offer.

CABLE COMPARTMENTS have rear accessible doors or panels and also have provisions for optional electric outlet strips. This compartment may be replaced with a modesty panel/wire-through combination.

STEEL WELDED UNDERFRAMES constructed of 14 Ga frame channel with 16 Ga. Struts "hat section" shape for strength.



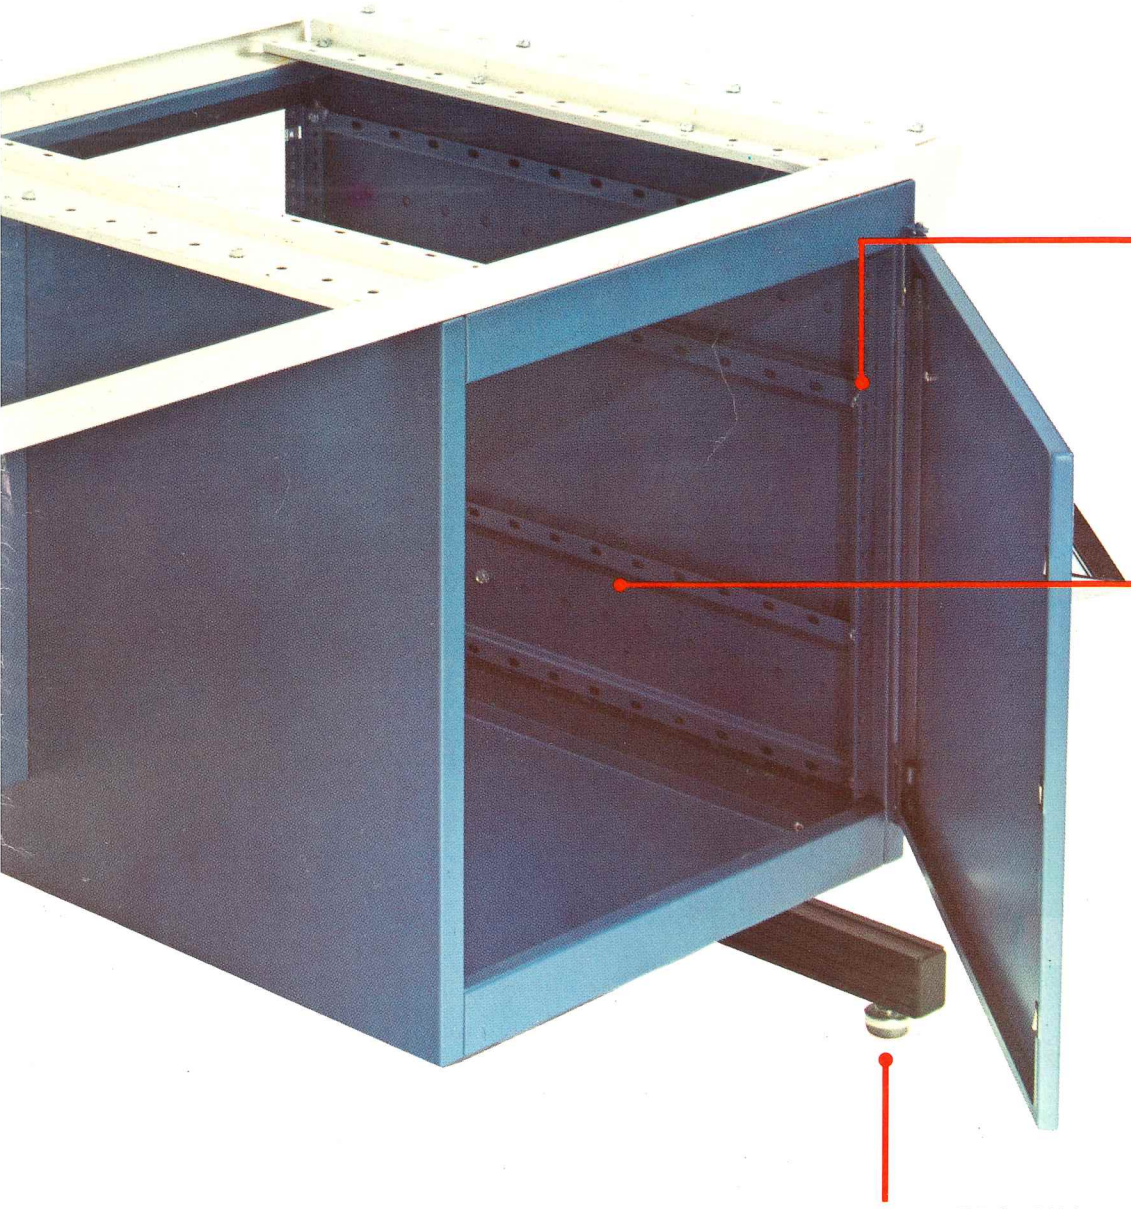
SAGPROOF UNDERFRAMES eliminate the problem of desk tops bowing, due to weight of equipment mounted on top and equipment in compartments below.

● **HIDDEN WIRING.** Exclusive Equipto design of pylons, cable troughs and compartments means all power and feed wiring is totally out of sight.

● **EQUIPTO QUALITY.** Engineered and manufactured by the most experienced personnel in the electronic enclosure field.

DESK SYSTEMS

pacesetter of the industry.



ADJUSTABLE PANEL MOUNTING ANGLES — strong (11 Ga) panel mounting angles add to the safety and reliability of mounted equipment. Furnished with universal, E.I.A. and W.E. hole spacing.

ELECTRONIC COMPARTMENTS have front and rear access with recessible panel mounting angles in the openings. Options of drawers, shelves, louvering, etc. Magnetic latching doors with pull handle, as well as panels, are available.

● **EQUIPTO DESK UNITS** are compatible in design and quality with our extensive line of rack cabinets, sloped front cabinets, machine control consoles and sloped front consoles. (Write us for catalogs describing this complete line.)

● **HIGH PRESSURE LAMINATED TOPS** with matching self-edging are available in Antique White or Gunstock Walnut as standard choices . . . or in any pattern and color laminate on special order.

● **COLORS.** Eight standard colors are available, but virtually any custom color can be matched and furnished. Standard finish is textured with durability exceeding many government standards. No extra charge for one coat special colors.

LEG LEVELERS. All base units have adjustable levelers. Optional ball casters (which will add 2" to the overall height) are available also.

● **DELIVERY IS FAST.** All components are in stock, ready to finish in your color selection.

● **MODULAR DESIGN.** This means you can literally "custom achieve" any configuration of units and eliminate the high cost of custom design and manufacture.

● **SIZE SELECTION.** Equipto Modular Electronic Desk Systems are made in two heights (30" desk or 26" keyboard) plus seven widths from 24" to 96" designed to meet virtually any equipment or instrumentation requirement.
